A CRM APPLICATION FOR THE CHAISHOP & CO

User Story:

As a sales executive working at TeaCornerHub, I need a CRM application that can help me efficiently organize and maintain customer information and sales activities.

The application should allow me to easily create, edit, and manage employer, customer, and enterprise records within a centralized platform.

The system should also support differentiation between online and walk-in customers using record types, which will allow better service management.

Additionally, the application must automatically calculate order quantities and total billing amounts to minimize manual errors.

The CRM system should also generate meaningful reports and dashboards to analyze sales performance and customer behavior.

Furthermore, automated email notifications should be sent to customers on special occasions like birthdays to improve engagement and maintain long-term relationships.

1. INTRODUCTION

1.1 Project Overview :

The project titled “CRM Application for TeaCornerHub” focuses on designing and implementing a Salesforce-based customer relationship management system.

This application helps businesses maintain employer accounts, customer data, and enterprise records in a structured and efficient manner.

The system simplifies business operations by automating order processing, billing calculations, and customer communication.

Reports and dashboards generated from the CRM system provide valuable insights for management to analyze business performance and make strategic decisions.

The project user story and objectives are defined in the initial section of the document

1.2 Purpose :

The purpose of this project is to:

- Streamline customer relationship management
- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

Idea ID	Concept Title	Explanation	Expected Benefit
ID1	Digital Customer Record	Develop a system that stores customer details in a digital format instead of maintaining manual records.	Easy access to customer information
ID2	Order Tracking	Introduce a feature	Helps monitor

	Feature	that records customer orders and maintains order history.	purchase patterns
ID3	Product Management	Provide functionality to add, edit, or delete tea shop products in the system.	Simplifies product updates
ID4	Customer Feedback System	Allow customers to submit feedback or suggestions through the system.	Improves service quality
ID5	Sales Reporting	Generate reports related to daily or monthly sales activities.	Supports better business analysis

2.2 Empathy Map Canvas

Target Users

- Sales Representatives
- Managers
- System Administrators
- Business Analysts

Empathy Analysis

Stakeholder	Observations	Needs / Expectations	Possible Solution
Customers	Customers prefer quick service and simple ordering process.	Fast order placement and accurate service.	Implement a system that records orders quickly and efficiently.
Shop Staff	Staff members manage multiple customer requests at the same time.	Easy access to customer and order details.	Provide a CRM interface that allows quick retrieval of information.
Shop Owner	Owner needs to monitor sales and customer activity regularly.	Proper reports and organized data.	Generate automated reports through the CRM system.
Regular Customers	Frequent customers may have specific preferences for products.	Personalized service and order history tracking.	

2.3 Brainstorming

Brainstormed Ideas

- Manual CRM system

- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login
- Access CRM Application
- Enter Customer Data
- Generate Orders
- Calculate Bills
- View Reports
- Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login
FR-2	Object Creation
FR-3	Data Entry
FR -4	Billing Automation
FR-5	Report Generation
FR-6	Email Automation

Non-Functional Requirements

Non-functional requirements describe the quality attributes and operational characteristics of the CRM system. These requirements focus on how effectively the system performs rather than the specific features it provides.

Requirement Type	Description
Performance	The CRM system should respond quickly when users access customer details, place orders, or generate reports.
Security	The application must ensure that only authorized users can access the system through proper authentication and login mechanisms.
Reliability	The system should operate consistently without frequent failures and must maintain data accuracy during usage.
Usability	The interface should be simple and easy to understand so that shop staff can use the system without difficulty.
Scalability	The system should be capable of handling an increasing number of customers and transactions in the future.
Availability	The application should remain accessible whenever users need to access the system for daily operations.

3.3 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards.

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports&Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation.

4.2 Proposed Solution

Functional Requirements

Requirement ID	Functional Feature	Description	Importance
FR1	Customer Registration	The system should allow new customers to register and store their basic details such as name, phone number, and address.	High
FR2	Customer Data Management	The CRM platform should enable staff to view, update, and maintain customer information whenever required.	High
FR3	Order Tracking	The system should record customer orders and maintain the order history for future reference.	Medium
FR4	Product Information Management	The platform should allow administrators to add, modify, or remove product details available in the tea shop.	Medium

FR5	Customer Feedback Handling	Customers should be able to submit feedback or suggestions, which will be stored and reviewed by the management.	Low
FR6	Sales Report Generation	The system should generate periodic reports related to sales, orders, and customer activity.	High
FR7	User Authentication	The CRM application should ensure secure login access for authorized users such as staff or admin.	High

4.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

This layered architecture ensures modularity, scalability, and maintainability.

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- The project followed an Agile-based development approach with defined milestones and sprints.
- A Salesforce Developer account was created to set up the development environment.
- Custom objects were designed to store customer, employer, and enterprise data.
- Custom tabs and a Lightning Application were developed for easy system navigation.
- Fields, relationships, and global picklists were configured to ensure data consistency.
- Page layouts and record types were created based on user roles and customer categories.
- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated flows were developed for customer notifications.
- Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

Product Backlog, Sprint Schedule, and Estimation

Use the below template to create product backlog and sprint schedule

Sprint	Funcional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application.	1	High	Manasa
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	3	High	Manasa
Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	3	High	Apana
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard.	3	High	Apana
Sprint-2	Data Modeling	USN-5	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	5	Medium	Apana
Sprint-2	Data	USN-6	As a user, I want	5	High	Apana

	Modeling		customized page layouts for different record types so that only relevant information is displayed during data entry			
Sprint-2	Data Modeling	USN-7	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently.	5	Medium	Apana
Sprint-3	Automation	USN-8	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	3	High	Safreen
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	5	High	Safreen
Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	5	High	Safreen
Sprint-5	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed	4	High	Baranika

			decisions.			
Sprint-6	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	4	Medium	Baranika

6. Project Development Phase:

Project Flow

- Milestone 1 : Creation of developer account
- Milestone 2 : Object Creation
- Milestone 3 : Tabs
- Milestone 4 : The Lightning App
- Milestone 5 : Global Picklist
- Milestone 6 : Fields and Relationships
- Milestone 7 : Creation of Page Layout
- Milestone 8 : Creation of Record Types
- Milestone 9 : Validation rules
- Milestone 10 : Email Templates
- Milestone 11 : Flows
- Milestone 12 : Reports and Dashboards
- Milestone 13 : Conclusion

What you'll learn

1. Real Time Salesforce Project
2. Standard and Custom objects
3. Picklist Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone 1 - Salesforce developer account creation :

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :
 - 1) First name & Last name
 - 2) Email
 - 3) Role : Developer
 - 4) Company : College or Company Name
 - 5) Country : India
 - 6) Postal Code : pin code
 - 7) Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in that format :
username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.
2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.
4. Then you will redirect to your salesforce setup page.

Milestone 2 - Objects

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Employer Account
- **Plural Label** : Employer Accounts
- Enter Record Name Label and Format

Record Name : Employer Account Name

Data Type : Text

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- Search Status : check the box for Allow Search.
- Save

Activity 2 : Customer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Customer Account
- **Plural Label** : Customer Accounts
- Enter Record Name Label and Format
Record Name : Customer Account Name
Data Type : Text
- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

Activity 3 : Enterprise Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Enterprise Account
- **Plural Label** : Enterprise Accounts
- Enter Record Name Label and Format
Record Name : Enterprise Account Name
Data Type : Text
- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.

2. Fill the app name in app details and branding as follow

App Name : TeaCornerHub

Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary color Hex or leave it to default.

Then click Next.

3. In App options

Navigation style : Standard navigation

Setup experience : setup

Supporters form factors : Desktop and phone

Then click Next

4. In Utility items

Utility Bar alignment : Default

Then click Next.

5. Navigation items

Select the created Custom Objects and required standard objects

- Customer Accounts
- Employer Accounts
- Enterprise Accounts
- Reports
- Dashboards

6. To Add User Profiles : System Administrator

7. Click Save & Finish.

Milestone 5 : Global Picklist

Activity 1 : Create Global Picklist

1. In Quick find box search for : Picklist value sets and click New.

● **Label** : Gender

Name : Auto Populates

Values : Male

Female

Others

Click Save & New.

2. Create three more Global picklists following the same steps.

● **Label** : Items

Name : Auto populates

Values : Platinum Tea Powder

Double Delight Tea Powder

Super Dust Tea Powder

Osmania Biscuits (Value Pack)

Osmania Biscuits (Premium Pack)

Dry Fruit Biscuits

Fruit Biscuits

Salt Biscuits

Multigrain Biscuits

Ragi Biscuits

Double Choco Chip Cookies

Butter Almond Cookies

Melting Moments Cookies

Honey Oats Cookies

Delight Box

Signature Box

Assorted Box

Click Save & New.

● **Label** : Payment Mode

Name : Auto populates

Values : Gpay

PhonePe

Paytm

Credit or Debit card

Cash.

Click **Save & New**.

● **Label** : Type of Items

Name : Auto populates

Values : Tea powder

Cookies

Gift Hampers

Click **Save**.

Milestone 6 : Fields & Relationships

Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : Employer Account
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.
7. Click on next.
8. Data Type : Text
Field Label: First Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.

9. Repeat the Same steps for remaining fields

- Data Type : Text
Field Label: Last Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.

- Data Type : PickList

Field Label: Gender

Values : Use Global Picklist value set and select Gender from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save and new.

- Data Type : Phone

Field Label : Phone Number

Field Name : Auto Populates

Required : Check the box

Click on Next → Next → Save and new.

- Data Type : Email

Field Label : Email ID

Field Name : Auto Populates

Required : Check the box

Click on Next → Next → Save and new.

- Data Type : Date

Field Label : Date of Birth

Field Name : Auto Populates

Required : check the box

Click on Next → Next → Save and new.

- Data Type : Text

Field Label : Aadhar Number

Field Name : Auto Populates

Length : 12

Click on Next → Next → Save and new.

- Data Type : Text

Field Label : PAN Details

Field Name : PAN_Details

Length : 10

Click on Next → Next → Save and new.

- Data Type : Picklist

Field Label : Designation

Field Name : Auto Populates

Value : Enter value, with each value separated by a new line.

Manager

Finance and Accounting

Kitchen Staff

Cashier

Servers

Click on Next → Next → Save and new.

- Data Type : Currency

Field Label : Salary

Field Name : Auto Populates

Click on Next → Next → Save.

Activity 2: Create Custom fields for Customer Account

1. Data Type : Text

Field Label: First Name

Field Name : Auto Populates

Length : 25

Required : Check the box

Click on Next → Next → Save and new.

2. Data Type : Text

Field Label: Last Name

Field Name : Auto Populates

Length : 25

Required : Check the box

Click on Next → Next → Save and new.

3. Data Type : **PickList**

Field Label: Gender

Values : Use **Global Picklist** value set and select Gender from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save and new.

4. Data Type : Phone

Field Label : Phone Number

Field Name : Auto Populates

Required : Check the box

Click on Next → Next → Save and new.

5. Data Type : Date

Field Label : Date of Birth

Field Name : Auto Populates

Required : check the box

Click on Next → Next → Save and new.

6. Data Type : **Formula**

Field Label : Date of Birthday is today ?

Field Name : Auto Populates

Formula Return : **Checkbox**

Formula :

```
IF(
  AND(
    DAY( TODAY() ) = DAY( Date_of_Birth__c ) ,
    MONTH ( TODAY()) = MONTH( Date_of_Birth__c )),
  TRUE,
  FALSE)
```

Click on Next → Next → Save and new.

7. Data Type : Email

Field Label : Email ID

Field Name : Auto Populates

Required : Check the box

Click on Next → Next → Save and new.

8. Date Type : Text

Field Label : Address

Field Name : Auto Populates

Length : 125

Click on Next → Next → Save and new.

9. Date Type : **Multi Select Picklist**

Field Label : Type of Items

Values : Use **Global Picklist** value set and select **Type of Items** from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save and new.

10. Date Type : **Multi Select Picklist**

Field Label : Products purchased

Values : Use **Global Picklist** value set and select **Items** from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save and new.

11. Date Type : **Multi Select Picklist**

Field Label : Chai

Value : Enter value, with each value separated by a new line.

TeaCornerHub Special Tea
Single Tea
Masala Tea
Lemon Tea
Ginger Tea
Green Tea
Sugar Free Tea

Click on Next → Next → Save and new.

12. Data Type : **Picklist**

Field Label : Payment Mode

Values : Use **Global Picklist** value set and
select **Payment Mode** from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save and new.

13. Data Type : **Lookup Relationship**

Related To : Employer Account

Field Label : Associated Employer

Field Name : Auto Populates

Click on Next → Next → Save and new.

14. Data Type : Formula

Field Label : Order Quantity

Field Name : Auto Populates

Formula Return : Number

Enter Formula = Quantity (Number) =

```
IF(INCLUDES( Products_Purchased__c , "Platinum Tea Powder"), 1, 0 ) +  
  IF(INCLUDES( Products_Purchased__c , "Double Delight Tea Powder"), 1, 0 ) +  
  IF( INCLUDES( Products_Purchased__c , "Super Dust Tea Powder") , 1, 0 ) +

```

10.Data Type : **Picklist**

Field Label : Payment Mode

Values : Use Global Picklist value set and
select **Payment Mode** from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save.

Milestone 7 : Page Layouts

For the personalized field view in Customer Accounts, let's create two page layouts
Online orders and Walk-In orders.

Activity 1: Online Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for

Customer Account object.

2. Click on the Page Layouts → click New.

3. Page Layout Name : Online Orders and click Save.

4. Drag and Arrange all the required fields as shown below.

5. Click **Save**.

Activity 2: Walk-In Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Page Layouts → click New.
3. Page Layout Name : Walk-In orders and click save.
4. Drag and Arrange all the required fields as shown below.
5. Click Save.

Milestone 8 - Record Types

To Differentiate the records and data stored in Customer Accounts, let's create two different Record Types.

Online orders and Walk-In orders.

Activity 1: Online Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Record Types → click New.

3. Enter Details :
 - Existing Record Type : Master
 - Record Type Label : Online Order
 - Record Type Name : Auto Populates
 - Active : Tick the checkbox
 - Click Next

4. In Assign Page Layouts
 - Select Apply one layout to all profiles : select Online orders from the drop down menu.
5. Click Save and New.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Record Types → click New.
3. Enter Details :

Existing Record Type : Master
Record Type Label : Walk-In Order
Record Type Name : Auto Populates
Active : Tick the checkbox
Click Next

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select Walk-In orders from the drop down menu.

5. Click Save.

Milestone 9 - Validation Rules

Activity 1: On Employer Account

1. Go to the setup page → click on object manager → From drop down click edit for Employer Account object.
2. Click on the validation rule → click New.

3. Enter Rule Name : Aadhar Number

Error Condition Formula :

```
AND(  
  NOT(ISBLANK( Aadhar_Number__c )),  
  LEN( Aadhar_Number__c ) <> 12,  
  NOT(REGEX( Aadhar_Number__c , "[1-9]{12}$"))  
)
```

4. **Error Message :** Aadhar number is required.

The Aadhar number must be 12 digits long.
Aadhar number can only contain numeric digits.
Aadhar number never starts with 0

5. Click **Save & New**.

6. Repeat the same steps and create two more validation rules on the employer account object.

● **Enter Rule Name** : PAN Number

Error Condition Formula :

```
AND(  
  NOT(ISBLANK( Phone_Number__c )),  
  NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),  
  NOT(REGEX( Phone_Number__c , "\\d+$"))  
)
```

Error Message : The PAN Details field must not be blank.

The PAN card number does not start with 0.

The PAN card number does not contain special characters.

Click **Save & New**.

● **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(  
  NOT(ISBLANK( Phone_Number__c )),  
  NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),  
  NOT(REGEX( Phone_Number__c , "\\d+$"))  
)
```

Error Message :

The phone number field must not be blank.

The phone number must consist of exactly 10 digits.

The phone number must contain only numeric digits

(no spaces, dashes, parentheses, etc.)

Click **Save**.

Activity 2: On Customer Account

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the validation rule → click New.

3. **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(  
  NOT(ISBLANK( Phone_Number__c )),  
  NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),
```

```
NOT(REGEX( Phone_Number__c , "^\\d+$"))
)
```

Error Message :

The phone number field must not be blank.

The phone number must consist of exactly 10 digits.

The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)

4. Click **Save**.

Activity 3: On Enterprise Account

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.

2. Click on the validation rule → click New.

3. **Enter Rule Name :** Phone Number

Error Condition Formula :

```
AND(
  NOT(ISBLANK( Phone_Number__c )),
  NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),
  NOT(REGEX( Phone_Number__c , "^\\d+$"))
)
```

Error Message :

The phone number field must not be blank.

The phone number must consist of exactly 10 digits.

The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)

4. Click **Save**.

Milestone 10 - Email Template

Activity 1: Email Template

1. Go to setup, In quick find box enter Email template → click on classic Email Template.

2. Click on → New Email Template

3. Choose the type of email template you would like to create : Text and click Next.

● **Available Merge Fields**

Select Field Type : Customer Accounts Fields

Select Field : First Name

Copy Merge Field value : Auto Populates, Copy the value and paste it in

the email body where required.

4. Folder : Unfiled public Classic Email templates
5. Click on available for use
6. Email Template Name is “Birthday Offer Email”
7. Template Unique Name : Auto populated
8. Subject : Special Birthday Offer Inside!
9. Email body :

Dear {!Customer_Account__c.First_Name__c},
Happy Birthday from all of us at TeaCornerHub! 🎂 We hope your special day is filled with joy, laughter, and wonderful memories.
To celebrate your birthday, we have a special gift just for you! As a token of our appreciation for your continued support, we're delighted to offer you an exclusive birthday discount.
Birthday Offer: Enjoy a fantastic 50% off on your next purchase as our birthday gift to you!
This offer is our way of saying thank you for being a valued customer. Simply use the code [HBDAY50] at checkout to redeem your birthday treat.
We hope this special offer adds a little extra sparkle to your birthday celebrations!
Once again, happy birthday! Thank you for choosing TeaCornerHub! and being part of our community.
Warm regards
TheChaiShop&Co!

10. Click Save.

Activity 2: Email Alert

1. Go to setup, In quick find box enter Email Alert → click on Email Alert .

2. Click on New Email Alert.
 3. **Description** : Happy Birthday email alert
 - Unique Name** : Auto Populates
 - Object** : Customer Account
 - Email Template** : Search for Birthday Offer Email
 - Recipient Type** : Search : Email field : Email ID
 - From Email Address** : Default Workflow user's email address

NOTE :

1. Make sure that the Default workflow user is assigned.

Milestone 11 - Flows

Let's create a scheduled Triggered flow to automate the Birthday offer mails.

Activity 1: Schedule Triggered Flow

1. Go to setup, Type Flow in quick find box → Click on the Flow and Select the New Flow.
2. Select Schedule - Triggered Flow and click Create.

3. Set a Schedule

Start Date : Enter the Date, when you want to start the flow.

Start Time : Enter the Time, when you want to start the flow.

Frequency : Daily

4. Create Object

Object : Customer Account

Condition Requirements : All conditions Are Met (AND)

- Field : Date_of_Birthday_is_today__c
Operator : Equals
Value : \$GlobalConstant.True
- Field : Email_ID_c
Operator : IS NULL
Value : \$GlobalConstant.False

5. Click (+) Icon on the flow builder and Select Action Component.

6. In New Action Page

Filter By : Type and select Email Alert

In Action : Search and select Happy Birthday email alert

Label : Send Happy Birthday Email

API Name : Auto Populates

Set Input Values for the Selected Action : Record ID : {!\$Record.Id}

7. Click **Done**.

8. Click Save on the top right

Flow Label : Happy Birthday Email Flow

Flow API Name : Auto Populates

Click **Save**.

9. Click **Activate**.

Milestone 12 - Reports & Dashboards

Activity 1: Customer Account Sales Report

1. Click App Launcher and select TeaCornerHub.
2. Click Reports
3. Click New Report
4. In search type Customer Accounts and Select Customer Accounts.

 5. Click Start Report.
 6. Click the toggle Update Preview Automatically to ON.
- Drag and Drop all the required Columns from the Outline pane.

Group Rows : Search and Select

Type of Items.

7. Click Add Chart on the top.
8. Click Save on the top right.
 - a. Enter
 - b. Report Name : Enterprise Account Sales Report
 - c. Report Unique Name : Auto Populates
 - d. Click Save.

Activity 3: Dashboard

1. Click Dashboards
2. Click New Dashboards
3. Name : Customer Vs Enterprise Sales
4. Click Create.
5. Click Widget
6. Select Chart or Table.
7. Select Customer Account Sales Report
8. Display As : Select the one which you feel comfortable with.
9. Click Add.
10. Repeat the same steps for the Enterprise Account Sales Report.
11. Click Save.

Milestone 12 - Conclusion

In conclusion, the development of TeaCornerHub CRM application marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities. Seamlessly integrating employer details, customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making. The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning interface to verify correct system behavior. These include:

- Record creation for Employer, Customer, and Enterprise objects
- Validation rule testing for Aadhar, PAN, and phone numbers
- Verification of record types and page layouts
- Formula field validation for order quantity and billing
- Flow execution for birthday email alerts
- Report and dashboard generation

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data management
- Reduced manual work
- Automated calculations
- Improved customer engagement
- Real-time analytics

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. Conclusion:

The CRM Application for TeaCornerHub successfully improves business operations by integrating customer data, automating billing, and enabling intelligent reporting. The system reduces errors, saves time, and enhances customer relationships through automation and analytics.

10. FUTURE SCOPE

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS alerts

- Inventory management
- Multi-branch support
- Advanced customer profiling
